

# When You Think of Extreme Temperature and Corrosion Resistance, Think of Norplex-Micarta.

[www.norplex-micarta.com](http://www.norplex-micarta.com)

Our thermoset composites provide thermal insulation down to cryogenic temperatures, and protect against the most corrosive elements:

- **Pipeline Supports** prevent temperature migration between the pipeline and support structure.
- **Gaskets** protect against cathodic corrosion and expansion/contraction in pipelines.
- **Specialty Components** for a wide range of midstream applications.

**Put the strength of Norplex-Micarta behind you.**

For more information on our high-strength products for midstream oil & gas applications, contact us today at [info@norplex-micarta.com](mailto:info@norplex-micarta.com), or 563-864-7321.
